Plas Hafod & Bryn Bugeiliaid Bach: Pre-Migration Testing Checklist

This checklist covers all technical configurations, functional features, automated workflows, and front-end validations required before switching live DNS from LiteSpeed/WordPress to the new Cloudflare Worker architecture.

---

1. Remaining Infrastructure & Environment Configuration

Before performing final live tests and repointing DNS, confirm these credentials and settings in your service dashboards:

Item	Service / Dashboard	Status	Description / Action Required
Resend API Key	Cloudflare Workers • Variables	☐	Ensure `RESEND_API_KEY` is configured as an encrypted environment variable in Cloudflare Worker settings so live emails can dispatch without simulation mode.
Sanity Write Token	Cloudflare Workers • Variables	☐	Verify `SANITY_API_WRITE_TOKEN` is present in Cloudflare Worker settings with Editor/Write permissions to allow status mutations (`status: 'confirmed'` , `depositSentAt` , `finalBalancePaid`).
CRON Secret	Cloudflare Workers • Variables	☐	Ensure `CRON_SECRET` matches the key configured in `wrangler.jsonc` (`plas-hafod-cron-2026`).
Notification Recipient	Cloudflare Workers • Variables	☐	Confirm `NOTIFICATION_EMAIL` is set to `bob@clic.cymru` (or host email) to receive instant booking and contact alerts.
Resend Domain Verification	Resend Dashboard • Domains	☐	Verify `plashafodcottage.co.uk` has green DKIM, SPF, and DMARC status in Resend so outgoing emails (`info@plashafodcottage.co.uk`) avoid spam filters.
Sanity CORS Origins	Sanity.io Management • API	☐	Add `https://plashafodcottage.co.uk` (with credentials allowed) to allowed CORS origins so the Studio operates properly once the live domain is connected.

---

2. Booking Engine & Pricing Calculation Testing

Test the interactive booking calendar on both cottage pages:

- **Plas Hafod Cottage**: Main Cottage Booking Form
- **Bryn Bugeiliaid Bach**: Annexe Booking Form
- [ ] **Blocked Dates Prevention**:
  - Click on dates known to be blocked (e.g., past reservations or maintenance dates).
  - Verify blocked dates are greyed out, strike-through, and cannot be selected as check-in or check-out.
- [ ] **Minimum Stay Enforcement**:
  - Attempt to book 1 night during a period with a 2 or 3-night minimum stay.
  - Verify the system prompts the guest that the minimum stay has not been reached.
- [ ] **Seasonal Pricing Calculation**:
  - Test dates during standard periods (e.g. November 2026 at standard base rate).
  - Test dates during peak festive periods (e.g. Christmas 2026 / New Year 2027).
  - Verify nightly pricing in the stay summary breakdown reflects the correct seasonal rate configured in Sanity.
- [ ] **Discount Rules**:
  - Select 7+ nights and verify the weekly discount (10–12%) automatically applies and appears in the breakdown.
  - Select 14+ nights and verify the fortnightly discount (18–20%) applies.
- [ ] **Deposit Calculation**:
  - Verify that the deposit required calculates to exactly **25%** of the stay total and the balance shows the remaining **75%**.
- [ ] **Form Submission & Feedback**:
  - Fill in test guest name, email, phone number, and special notes.
  - Click **Request Reservation**.
  - Verify the loading spinner appears, followed by a green success confirmation screen displaying the booking reference.

---

3. End-to-End Email Lifecycle Testing

Conduct a complete dry-run of a reservation to verify all 5 stages of communication:

Step A: Initial Inquiry Dispatch

- [ ] **Host Alert**: Check `NOTIFICATION_EMAIL` inbox (`bob@clic.cymru`). Confirm receipt of the dark-themed dashboard alert with complete booking breakdown, guest notes, and direct link to Sanity Studio.
- [ ] **Guest Receipt**: Check the test guest's email inbox. Confirm receipt of the branded *Croeso / Welcome* confirmation email with booking summary and host details.

Step B: Deposit Request from Sanity Studio

- [ ] Open Sanity Studio.
- [ ] Navigate to **Booking Engine $\rightarrow$ Cottages $\rightarrow$ Bookings**.
- [ ] Open the test booking inquiry.
- [ ] Click **Send Deposit Request Email**.
- [ ] Verify that the guest receives the BACS transfer email with:
  - Deposit amount (25%)
  - Sort Code, Account Number, and Bank Name
  - Unique Payment Reference (e.g. `PH-2611-TEST`)
  - Correct cottage address in Nebo, Penygroes (`LL54 6EB`)

Step C: Confirming Booking & Dates Blocking

- [ ] In Sanity Studio, click **Mark Paid & Confirmed ✓**.
- [ ] Refresh the website calendar on the frontend and confirm the dates are now blocked out to prevent double-booking.

Step D: Final Balance & 14-Day Automation

- [ ] In the booking card in Sanity Studio, review the **Check-in & Final Balance Automation Box**.
- [ ] Test **Unpaid Balance Scenario**:
  - Leave *Final Balance Paid* unchecked.
  - Click **Send 14-Day Balance Reminder Now** .
  - Verify the guest receives the Balance Due Reminder with remaining balance amount, BACS details, and notice that the key code will follow once paid.
- [ ] Test **Paid Balance & Check-in Guide Scenario**:
  - Click **✓ Mark Final Balance as Paid (BACS Received)**.
  - Click **Send Check-in Guide Now** 🚀.
  - Verify the guest receives the Arrival Guide email containing:
    - Key safe code (e.g., `PH-4821` or custom override)
    - High-speed WiFi SSID and password
    - Driving directions via Penygroes and Nebo
    - Check-in (4:00 PM) & check-out (10:00 AM) times
    - Waste and recycling bin locations

Step E: Automated Cloudflare Cron Trigger

- [ ] Test the cron endpoint via browser or curl:

```
curl -s "https://plas-hafod-cottage.bob-83d.workers.dev/api/cron/automated-emails?dryRun=true&sec
```

- [ ] Verify HTTP 200 response with JSON summary:
  - `success: true`
  - `totalEvaluated: [count of active bookings]`
  - `actionsDispatched: 0` (or list of actions if bookings are within 14 days)

---

4. Website Contact Form Testing

- [ ] **English Contact Page (`/contact`)**:
  - Submit a test inquiry with name, email, phone, and inquiry message.
  - Verify submission success toast appears.
  - Verify host alert email arrives in `bob@clic.cymru` inbox.
  - Verify visitor auto-reply email arrives in the sender's inbox.
  - Open Sanity Studio $\rightarrow$ **Pages $\rightarrow$ Contact** and confirm the message is recorded under the Contact inbox.
- [ ] **Welsh Contact Page (`/cy/contact`)**:
  - Repeat the test in Welsh.
  - Verify the auto-reply is delivered in idiomatic Welsh (*Diolch am Gysylltu*).

---

5. Content, Navigation & Bilingual Integrity

- [ ] **Language Toggle (Bilingual Mirroring)**:
  - Test the English $\leftrightarrow$ Welsh switcher on all 6 core URL pairs:
    - `/` $\leftrightarrow$ `/cy`
    - `/bryn-bugeiliaid-bach` $\leftrightarrow$ `/cy/bryn-bugeiliaid-bach`
    - `/local-area` $\leftrightarrow$ `/cy/local-area`
    - `/reviews` $\leftrightarrow$ `/cy/reviews`
    - `/contact` $\leftrightarrow$ `/cy/contact`
    - `/terms` $\leftrightarrow$ `/cy/terms`
  - Verify the page switches without 404 errors and keeps the user on the matching view.
- [ ] **Local Area Guide & FAQ Section (`/local-area`)**:
  - Test interactive accordion toggles on all 7 FAQ items (Location in Nebo, amenities in Penygroes, Nantlle Ridge walking, Yr Wyddfa distances, cottage differences, dog policy, parking).

- Check Welsh accordion (`/cy/local-area`) for Welsh copy.

- [ ] **Guestbook & Reviews (`/reviews`)**:
  - Confirm authentic guestbook excerpts and platform badges (Airbnb, Vrbo, Google) display cleanly.
  - Test the cottage filter tab (`All Reviews` , `Plas Hafod` , `Bryn Bugeiliaid Bach`).

- [ ] **Footer & Contact Details**:
  - Check that the phone number is `01286 880620` (clickable `tel:` link).
  - Check mobile `07917 843187` .
  - Check address shows: `Plas Hafod, Nebo, Penygroes, Caernarfon, Gwynedd, LL54 6EB` .
  - Ensure zero residual references to *Llanrug*, *Betws-y-Coed*, or *Conwy*.

---

6. Technical SEO, GEO & Performance Verification

- [ ] **XML Sitemap (`/sitemap.xml`)**:
  - Verify XML output containing all 12 localized URLs with `xhtml:link rel="alternate"` tags for both `en-GB` and `cy-GB` .

- [ ] **Robots Rules (`/robots.txt`)**:
  - Verify public pages are allowed, `/studio/` is disallowed, and sitemap URL is listed.

- [ ] **Structured Data (Google Rich Results)**:
  - Test home page in Google Rich Results Test:
    - Verify `LodgingBusiness` with both `Plas Hafod Cottage` and `Bryn Bugeiliaid Bach` under `containsPlace` .
    - Coordinates: Lat `53.0335` , Long `-4.2618` .
  - Test `/local-area` : Verify `FAQPage` schema is recognized with question/answer pairs.

- [ ] **Responsive / Mobile Audit**:
  - Test on iOS (Safari) and Android (Chrome).
  - Verify hamburger navigation opens smoothly.
  - Verify date picker displays properly without horizontal scroll overflow.
  - Verify image carousels swipe smoothly.

---

7. Live DNS Migration Execution Plan

Once all items above are checked off:

1. **Log in to Cloudflare DNS Dashboard** for zone `plashafodcottage.co.uk` .
2. **Review Existing DNS Records**:
   - Note the old LiteSpeed server IP (`185.151.30.138`).
3. **Configure Worker Custom Domain**:

- In Cloudflare Dashboard $\rightarrow$ **Workers & Pages** $\rightarrow$ `plas-hafod-cottage` $\rightarrow$ **Settings** $\rightarrow$ **Domains & Routes**.
- Click **Add Custom Domain** $\rightarrow$ enter `plashafodcottage.co.uk`.
- Add second custom domain $\rightarrow$ `www.plashafodcottage.co.uk`.
- Cloudflare will automatically route incoming traffic from the edge to the Worker with SSL auto-provisioned.

4. **Purge Cache & Verify**:
   - Open browser incognito window $\rightarrow$ browse to `https://plashafodcottage.co.uk`.
   - Verify immediate 200 OK response from the Cloudflare Worker.
   - Verify `/studio` loads and allows login.
   - Verify email dispatch from the live domain.
